

Cross-curricular Activity in Primary five

On 12th December, P.5 students had a special learning experience in Stanley. It is a cross-curricular activity which integrates English and General Studies. The students interviewed some tourists there and used an iPad to record the interviews so that they could evaluate their performance later during the lessons. This activity aims to provide opportunities for students to practise speaking English in everyday life in order to enhance their speaking ability.

Look! We were all very excited after travelling on the coach for almost an hour.

We used an iPad to take photos with this tourist from the U.S.A. after the interview.
